

STUDENT SELF-PROFILE PORTFOLIO

PERSONAL DEVELOPMENT & ACADEMIC PLAN REPORT

Prepared by:

Aanya Reddy

Course: Bachelor of Computer Applications (BCA)

PR Key: ITEG-BCA-2026-889

Submitted to:

Sant Singaji Institute of Science and Management (SSISM)

Academic Session: 2026 - 2027

1. PERSONAL BIO & DESCRIPTION

I am Aanya Reddy, a dedicated and passionate student currently pursuing my Bachelor of Computer Applications (BCA) at SSISM. Ever since my childhood, I have been deeply fascinated by how software runs and helps connect people across geographies. I describe myself as a proactive learner, highly collaborative team member, and logical thinker. I enjoy building things, solving algorithmic coding puzzles, and collaborating on academic projects with my peers. My core interests lie in web development, database management, and full-stack software development.

2. SCHOOLING & EDUCATION HISTORY

I completed my early education in my hometown with a strong academic record. I completed my Secondary School Certificate (10th Standard) with a score of 88.5%, showcasing high aptitude in Mathematics and Science. Later, I pursued my Higher Secondary Certificate (12th Standard) with a focus on Physics, Chemistry, and Mathematics (PCM), where I secured 84.2% marks. During my schooling, I actively participated in quiz competitions and local science fairs. I made projects on smart garbage systems and alternative energy sources, which helped spark my passion for technical innovation and engineering.

3. PAST ACHIEVEMENTS

Throughout my academic journey, I have aimed for balanced excellence:

- Secured 1st Rank in District Mathematics Olympiad during 11th Standard.
- Awarded "Best Science Model" at the regional inter-school science exhibition.
- Served as the Vice Captain of the school basketball team, leading the team to regional finals.
- Received the "Outstanding Academic Student" scholarship for two consecutive years in high school.
- Maintained a consistent level history profile with clean evaluation reviews throughout my initial college semester.

4. FAMILY BACKGROUND

I come from a supportive, middle-class family based in Indore. My father is an agricultural worker who dedicates his life to farming, and my mother is a homemaker. Although my parents did not receive higher professional education themselves, they have always prioritized my studies and encouraged me to pursue my technical dreams. My family supports my decision to enter the software engineering stream and provides me with moral and mental strength. I have an older brother who works in local administration and acts as an anchor guide in helping me make career choices.

5. HOBBIES & INTERESTS

My hobbies keep me mentally active and physically fit:

- Coding Challenges: I spend 1-2 hours daily solving basic algorithms on platforms like LeetCode and HackerRank.
- Reading Technology Blogs: I love keeping up with node.js upgrades, React 19 releases, and AI advancements.
- Sports: I enjoy playing badminton and basketball on weekends, which helps me learn team dynamics and leadership.
- Gardening: Tending to my home garden helps me practice patience and mindful focus after hours of screen time.

6. SHORT-TERM GOALS (1–2 YEARS)

My immediate milestone goals focus on building core professional capabilities:

1. Master Fullstack Engineering: To fully grasp frontend layout principles (React, tailwind) and backend integrations (Node.js, Express, databases).
2. Excel in Academic Levels: To complete my levels (Level 1, 2) at SSISM with excellent performance and clear all subject assignments.
3. Secure a Software Internship: To work as a software development intern in a reputable technology company to gain real-world environment training.
4. Improve Soft Skills: To participate in group discussions, debates, and mock interviews to build robust spoken English confidence and presentation style.

7. LONG-TERM GOALS (3–5 YEARS)

My long-term career aspirations are:

1. Become a Technical Architect: Design scalable, highly available enterprise-level software systems in global IT firms.
2. Open-Source Contributor: Maintain and contribute to popular open-source libraries, establishing a strong international developer profile.
3. Community Mentorship: Establish local technology education camps in rural areas to help underprivileged children learn computing fundamentals for free.
4. Leadership Role: Guide technical teams as a Engineering Lead, helping direct product vision and engineering standards.

8. CONCLUSION

This self-profile serves as a mirror roadmap of my current capabilities and future destinations. By structuring my educational benchmarks, family support, personal values, and goals, I can identify the specific study focus areas and soft-skills checkpoints I must complete. I am committed to putting in consistent, high-energy efforts under the guidance of my college faculty to reach these heights of academic and professional perfection.
